

THREE USEFUL TERMS :

BLUE SPACE

A blue space is any outdoor environment that features water. Examples - Beach, river, lake, stream, canal, wetland.

SENSE OF PLACE

The meanings and emotions we connect to a particular place. As it grows and develops it influences our actions and we are more likely to take care of our environment and become guardians of our blue space.

BLUE MIND

The science that shows how being near, in, on or under water can make you happier, healthier, more connected and better at what you do.

WORLD OCEAN DAY FOR SCHOOLS

World Ocean Day for Schools is the perfect day to celebrate all things blue. Every year we bring together an amazing group of ocean educators to create a day filled with fun activities and lessons for schools all over the world.

Check out our website for more info:

HOW TO MAKE YOUR MEMORY MAP

Memory maps help us capture a collection of all our favourite things about a specific place. We start by drawing a normal map of a place and then we add in memories, experiences, places and things that are important to us.

- Step 1:** Think of your nearest local blue space (if you can visit it to create your memory map - even better!).
- Step 2:** Start drawing your map with an outline of the space and any key features.
- Step 3:** Give yourself some time to think about your blue space. What things did you see, feel, smell, hear? What living things were there (plants, animals etc)? Who was there with you? What things did you do?
- Step 4:** Add your memories to the map - You can add old and new memories. They can be simple drawings, icons or words (or a combination of all three). You can scribble notes on the side to add more details if you want to.
- Step 5:** Share your map with your family, friends and us!
Ask an adult to help you upload it to our website via our QR code.

DID YOU KNOW ?

Did you know that you can be an ocean advocate even if you live inland? All our waterways connect to the ocean - so every stream, every river, every canal leads back to the sea. Taking care of our local blue space, no matter how far we live from the coast, means we are taking care of the ocean.
